

Como Ser Saludable

How To Be Healthy

Barranquilla, Colombia June 15, 2020

Iván Duque, President of Colombia
Rodolfo Enrique Zea Navarro, Minister of Agriculture and Rural Development
Fernando Ruiz Gómez, Minister of Health and Social Protection
Chamber and Senate of the Republic of Colombia

Donald Trump, President of the USA
Sonny Perdue, US Secretary of Agriculture
Michael R. Pompeo, US Secretary of State
Monsanto, its board of directors St. Louis, Missouri, USA

Urgent call:

I, Victor de los Santos Alemañy, accuse acts of terrorism and endanger the national security of Colombia and the United States, and request justice against Juan Manuel Santos, former president of Colombia, against Barack Obama, former president of the United States, and against the Monsanto Board of Directors.

Here are the facts:

Former President Juan Manuel Santos signed the Free Trade Agreement with Barak Obama who represented the United States. The harmful and evil part of that treaty is to compel farmers in Colombia to use Monsanto's GM seeds, and the farmer who uses his own seed will be charged as a crime. It has already happened in Huila, where the police overwhelmingly attacked the farmers and took the best quality rice seeds from them.

It has already been documented that transgenic corn is bad, it does not apply for important food uses and they have been forced to replant natural corn, from the best seeds of the farmers.

Already in Colombia they have murdered many peasant and community leaders who were promoting the healthy and the natural. On May 16, 2020, Jorge Enrique Oramas Vásquez, community leader and farmer, defender of organic seeds and clean water, was coldly assassinated. See the report: <https://elcolectivocomunicacion.com/2020/06/10/asesinaron-al-palabrero-de-las-semillas-nativas-y-defensor-del-agua/?fbclid=IwAR0tHe3ophkJvuaN89rBUdbN79fzXlkb-n0uTEXtF2YukuMIp1N1>

We are currently planning a great awakening in agriculture with technology called Bioagriculture, clean, healthy, 100% organic, and we will never and never allow a GMO seed to be present 1000 km from us.

The disgusting thing about Monsanto is that it has sued farmers in the United States and in other countries, Monsanto, its board of directors and some presidents, are a scourge of society disguised as benefactors. And I demand that justice be done.

To the President of Colombia, Iván Duque, and our President of the USA, Donald Trump, I request that you immediately cancel all business with Monsanto, and bring to justice all the wrong they have done. This is based on the fact that it is biological terrorism that endangers the health of nations.

At best, possibly many Monsanto employees, who claim to be 20,000, and some farmers and politicians, have believed the lie that GMO seeds are good and a benefit. But it is time to open your eyes and realize the reality.

The call is for everyone:

To all farmers, to all health specialists, to all food companies, to all community leaders, to the general public, please forward this letter so that everyone in Colombia and the United States reads it and demands from their rulers bring to justice all these culprits. Guilty because it is already proven beyond a reasonable doubt.

I urge all farmers and producers to discard all GM seeds and to learn to save the best seeds from their crops. This is a general call, no one can remain silent and indifferent to these evil assassins who harm the present and future of our agriculture, it is up to you to be a Samson, or a David who killed the lions with his hands.

God bless you greatly,

His brother and friend
